Deep Fathom + Elevate = Clear Compliance

Know what compliance requirements mean for your next defense opportunity.

Pursuing defense work or joining a prime's team?
Start by understanding the compliance requirements tied to that work.

Elevate and Deep Fathom bring expert guidance and compliance software together. Identify what applies to your company, organize the work, and prepare the evidence behind your response.

Our focus includes readiness for Cybersecurity Maturity Model Certification (CMMC) and the handling of federal contract information (FCI) and controlled unclassified information (CUI).

Scope it. Run it. Prove it.

ELEVATE 01

Scope it

Elevate helps identify the information your company handles, the systems involved, and the requirements that apply.

DEEP FATHOM 02

Run it

Turn agreed requirements into tasks with owners and dates. Deep Fathom keeps supporting evidence alongside the work.

TOGETHER 03

Prove it

With your advisors, review progress and open gaps. Prepare supporting records for customer questions and assessment.

Talk through what applies and what to do next.

ELEVATE

Kellie Tomeo, Esq.
VP, CMMC SOLUTIONS
28 years practicing law, advising contractors since 2006.

Rachel Bassford
CUI PROGRAM ADVISOR
Founding CUI Program Analyst at the National Archives, former FBI Chief Security Officer.

DEEP FATHOM

Steven Hess
CO-FOUNDER AND CEO
Former CEO of Cloud Storage Security, trusted by federal agencies to protect critical data.

Kevin Hunt
CO-FOUNDER AND CTO
Former CTO of Cloud Storage Security, engineering leadership at Microsoft.

Talk through your next step.

Tell us which customer requirement or compliance question you're working through. We'll help identify the right follow-up with Elevate or Deep Fathom.
